

Environmental Policy Statement

Abriox Limited is a technology-based company headquartered in Newport, UK. Our core expertise is monitoring of gas and fuel pipelines and we have a range of products for this application.

Our products enhance the environment by reducing the risk of hydrocarbons escaping from pipelines and, by automating manual measurements, eliminate many thousands of vehicle miles with their associated carbon emissions.

We recognise that in our day-to-day operations we impact on the environment in a number of ways. We are committed to achieving continual improvement in our environmental performance and pollution prevention, and in supporting government policy for sustainable development. Our policy is to conduct our business in such a way as to lessen or eliminate any adverse effect on the environment.

In order to achieve this, the company will:

- Use good environmental practices in its day to day operations
- Use material from suitable sources
- Use registered waste disposal companies for removal of waste streams
- Always maintain high standards of cleanliness in respect of litter and waste packaging
- Ensure any cleaning agents are of a biodegradable nature
- Ensure that any chemicals that are used do not present an environmental hazard
- Limit to a minimum and strive to eliminate all emissions to the atmosphere e.g. dusts and carbon monoxide
- Limit to a minimum the use of electricity and gas supplies and work to eliminate any wastage
- Not use any chemicals that have a detrimental effect on the ozone layer
- Consider the environmental impacts of new equipment or new work undertaken
- Lessen the impact of any nuisance noise and work within set hours within residential areas
- Respect all clients' policies aimed at achieving a better environment

This policy will be reviewed annually and will form the basis of all future environmental improvements.

SEAN DANIELS
