

Quality Policy Statement

We define our Quality Policy as the ability of Abriox to consistently meet or exceed the expectations of our customers in a manner consistent with our core values:

- High product quality
- Relevant, innovative product design
- Progressive market leadership
- On time, every time at the lowest possible cost

We believe that the Quality System is the basis to achieving our strategic objective of becoming the leading supplier of equipment for monitoring underground assets worldwide.

We are committed to working in partnership with customers and suppliers to:

- Design and develop products that meet internal and external requirements
- Improve customer satisfaction
- Add value and growth both to ourselves and our customer base

Our Quality Management System is certified to **ISO 9001:2015**.

In addition, the Quality System is registered to **IECEX 02** and **ATEX Directive 2014/34/EU** (Annex IV and VII), including the particular requirements of **EN ISO/IEC 80079-34:2018** enabling Abriox to manufacture equipment in accordance with the Ex certificate.

Committed to continuously improving the design of our products and develop the processes through the establishment and monitoring of relevant quality information in line with the requirements of this standard; identifying the potential for errors and taking the necessary action to eliminate them.

We will meet all statutory and regulatory requirements that pertain to our business.

Establish quality objectives on an annual basis in order to continue our journey towards zero defects. Through periodic reviews we will act on this data to continuously improve the Quality System and thus our business.

Abriox Management is responsible for providing leadership to ensure that this policy and the underlying objectives are understood and implemented throughout the organization.
